WILLIAM TEPPIG

LEAD PRODUCT DESIGNER | UX DESIGN

704-277-6888 | wteppig@gmail.com | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

Lead Product Designer and UX Design Leader with 15+ years of experience defining and delivering enterprise digital products across financial services, healthcare, and SaaS. Leads end-to-end product design from discovery and UX strategy through research, interaction design, prototyping, validation, design systems, and engineering delivery.

Experienced solving complex customer and business problems across enterprise applications, responsive web products, servicing platforms, and AI-enabled experiences. Trusted partner to product management, engineering, research, data, operations, legal, compliance, and executive stakeholders. Proven experience mentoring designers, leading multidisciplinary design initiatives, influencing product strategy, improving design systems, and translating customer insights into measurable business outcomes.

CORE COMPETENCIES

Product Design Leadership • UX Leadership • UX Strategy • Product Strategy • End-to-End Product Design • User-Centered Design • Human-Centered Design • Interaction Design • Information Architecture • User Flows • Journey Mapping • Workflow Design • Product Discovery • UX Research • User Interviews • Usability Testing • Wireframing • Rapid Prototyping • High-Fidelity Design • Design Systems • Design System Governance • Responsive Web Design • Enterprise Applications • SaaS • AI-Enabled Experiences • Accessibility / WCAG • Data Visualization • Cross-Functional Leadership • Stakeholder Management • Executive Communication • Design Thinking • Lean UX • Agile Product Development

PROFESSIONAL EXPERIENCE

LPL FINANCIAL Senior Product Designer | June 2025 – August 2026

• Led UX strategy and product design for personalization, advisor branding, and entitlement management across the ClientWorks enterprise platform.

• Partnered with product management, engineering, and business stakeholders to define product direction, clarify requirements, and prioritize customer experience investments.

• Conducted stakeholder interviews, workflow analysis, and usability research to identify customer needs, experience gaps, and opportunities for product innovation.

• Translated research insights and complex business requirements into user flows, interaction models, prototypes, and intuitive enterprise experiences designed to improve advisor efficiency and reduce administrative effort.

• Applied AI-assisted workflows to accelerate research synthesis, concept generation, design exploration, prototyping, and product documentation while maintaining human-centered design decision-making.

• Collaborated across the product development lifecycle to move concepts from discovery and validation into developer-ready design specifications and implementation.

BANK OF AMERICA **Senior UX Designer | May 2023 – May 2025**

• Co-led end-to-end UX design initiatives across Payments, Accounts, and Payment Plan servicing experiences supporting large-scale customer service operations.

• Redesigned complex servicing workflows using customer research, workflow analysis, information architecture, and iterative product design.

• Simplified customer and agent journeys, contributing to a **27% reduction in average call times** while improving consistency across customer interactions.

• Embedded user research and usability feedback throughout product delivery, improving design quality and reducing downstream rework.

• Partnered with product managers, engineers, business stakeholders, Legal, Compliance, and Operations to translate complex customer, business, regulatory, and technical requirements into usable digital experiences.

• Contributed to enterprise design systems and reusable interaction patterns while supporting accessibility, consistency, and scalable product delivery.

PREMIER, INC. **Principal UX Designer | January 2020 – February 2023**

• Led UX strategy and experience design across enterprise healthcare platforms supporting supply chain, pharmacy, quality improvement, and clinical research.

• Managed and mentored a multidisciplinary UX team of **three designers and one UX researcher**, providing design direction, coaching, and support across concurrent product initiatives.

• Directed end-to-end product discovery, concept development, interaction design, prototyping, validation, and delivery across multiple enterprise initiatives.

• Partnered with product and technology leaders to translate customer needs, business objectives, healthcare workflows, and technical constraints into product strategy and experience direction.

• Championed enterprise design system adoption and UX governance across product teams, improving consistency and supporting scalable design delivery.

• Led rapid-response COVID-19 initiatives that transformed predictive healthcare data into actionable decision-support experiences for hospital systems.

• Designed data-rich enterprise experiences that helped healthcare professionals interpret complex information and support operational and clinical decision-making.

PREMIER, INC. Lead UX Designer | February 2010 – December 2019

• Led UX design across multiple enterprise healthcare products used by clinicians, administrators, and supply chain professionals.

• Facilitated product discovery, customer interviews, journey mapping, workflow analysis, information architecture, and usability testing throughout the product lifecycle.

• Designed complex enterprise applications and workflows focused on improving operational efficiency and simplifying critical healthcare tasks.

• Created user flows, wireframes, interaction models, prototypes, and high-fidelity designs for responsive web applications.

• Partnered with executives, product managers, architects, engineers, and subject-matter experts to align customer needs, business priorities, and technical requirements.

• Helped evolve enterprise design systems, UX standards, and reusable interaction patterns to improve consistency across product portfolios.

• Presented product concepts, research findings, design rationale, and experience recommendations to stakeholders and executive leadership.

TOOLS & TECHNOLOGIES

Design & Collaboration: Figma, FigJam, Miro, Lucidchart

AI & Rapid Prototyping: Figma Make, Cursor, ChatGPT, Claude

UX Methods: User Interviews, Stakeholder Interviews, Journey Mapping, Workflow Analysis, Information Architecture, Wireframing, Prototyping, Usability Testing, Design Systems, Accessibility Evaluation

EDUCATION

Bachelor of Science in Design. Clemson University
