## **STAFF UX DESIGNER | UX STRATEGIST | DIGITAL HEALTH & FINTECH**

UX leader with 15+ years of experience designing complex digital products across healthcare, financial services, and enterprise software. Expertise in translating business objectives, user needs, and technical constraints into intuitive customer experiences that drive measurable outcomes.

Proven track record leading cross-functional teams through discovery, experience strategy, research, and product design for web, mobile, and connected digital ecosystems. Skilled at influencing product direction, aligning stakeholders, and delivering scalable solutions that improve usability, operational efficiency, and customer outcomes.

### **Core Competencies**

Experience Strategy • Product Design Leadership • User Research • Product Discovery • Journey Mapping • Service Design • Systems Thinking • Design Systems • Healthcare Technology • Digital Health • Cross-Functional Leadership • Stakeholder Alignment • Usability Testing • Information Architecture • Product Strategy • AI assisted Research, Design, and Prototyping

## **Strategic Impact**

### **Premier**

Led strategy and design for enterprise healthcare platforms serving clinicians, administrators, supply chain teams, and researchers. Introduced workflow-driven experiences that reduced task complexity and decreased primary task completion steps by 40%.

### **LPL Financial**

Defined personalization and access-management strategy for the ClientWorks platform, transforming advisor branding and entitlement workflows from multi-day administrative efforts into self-service experiences completed within minutes.

## **Bank of America**

Redefined call-center servicing experiences by integrating customer insights into product development, reducing average call times by 27%, improving agent efficiency, and creating more consistent customer outcomes.

## **Experience**

### **Product Designer (UX Strategy Focus)**

LPL Financial | June 2025 – Present

- Lead experience strategy for personalization, access management, and advisor branding across the ClientWorks platform.
- Conduct discovery through stakeholder workshops, customer interviews, workflow analysis, and journey mapping to identify unmet customer needs.
- Translate research findings into product recommendations, influencing roadmap prioritization and platform investment decisions.
- Collaborate with product, engineering, and business stakeholders to align customer experience goals with organizational objectives.
- Leverage AI-assisted research synthesis, concept generation, and prototyping workflows to accelerate discovery and design validation.

### **UX Designer (Strategic Experience Lead)**

Bank of America | May 2023 – May 2025

- Led end-to-end design initiatives across Payments, Accounts, and Payment Plan experiences supporting large-scale customer service operations.
- Embedded continuous user feedback and usability testing into product delivery processes, improving design quality and reducing downstream rework.
- Simplified complex servicing workflows through journey mapping and behavioral analysis, reducing average call times by 27%.
- Influenced cross-functional decision-making by translating customer insights into actionable product strategies and design recommendations.
- Partnered closely with product managers, engineers, and business leaders to align user experience investments with operational goals.

## **Principal UX Designer**

Premier, Inc. | January 2020 – February 2023

- Led a pod of 2 UX designers and a UX researcher
- Led UX strategy and design direction across healthcare platforms supporting supply chain, clinical quality, pharmacy, and research initiatives.
- Directed multidisciplinary teams of designers and researchers through discovery, concept development, validation, and delivery.
- Established scalable research frameworks that uncovered workflow inefficiencies and informed enterprise product strategy.
- Guided design system adoption and experience standardization efforts across multiple product teams.
- Led rapid-response design initiatives during the COVID-19 pandemic, helping transform predictive healthcare data into actionable decision-support tools used for resource planning and operational readiness.

## **Lead / Senior UX Designer**

Premier, Inc. | February 2010 – December 2019

- Led discovery, persona development, workflow analysis, and journey mapping efforts across numerous healthcare products and services.
- Designed enterprise applications used by healthcare professionals to improve operational efficiency, clinical decision-making, and supply chain management.
- Conducted usability testing and iterative validation activities to reduce delivery risk and increase confidence in product investments.
- Contributed to design systems, UX standards, and governance practices that improved consistency and scalability across product portfolios.
- Partnered with executives, product leaders, and engineering teams to align customer experience strategy with organizational objectives.

## **Education**

BS Design | Clemson University 1992-1995

## **Core Competencies**

Figma • FigJam • Figma Make • Cursor • ChatGPT • Claude • Miro • Lucid
