LEAD UX DESIGNER | SENIOR PRODUCT DESIGNER | UX STRATEGIST

Lead Product Designer with 15+ years of experience designing enterprise-scale digital products across financial services, healthcare, and SaaS platforms. Experienced leading end-to-end product design from discovery through delivery, partnering with executives, product managers, engineers, researchers, and data teams to solve complex customer problems.

Known for leading through ambiguity, shaping product strategy with customer insights, and delivering intuitive experiences across responsive web, enterprise applications, and AI-enabled platforms. Proven ability to mentor designers, influence executive stakeholders, evolve design systems, and drive measurable business outcomes while balancing customer needs, technical constraints, and regulatory requirements.

CORE STRENGTHS

Enterprise Product Design • Experience Design Leadership • Interaction Design • Visual Design
Information Architecture • User Flows • Journey Mapping • Design Systems • Responsive Web •
AI Experiences • Product Discovery • Design Strategy • UX Research • Usability Testing •
Design Thinking • Lean UX • Accessibility (WCAG) • Cross-functional Leadership • Executive
Presentations • Stakeholder Management • Agile • Figma • FigJam • Cursor • Claude • ChatGPT
• Figma Make

AI-ACCELERATED UX PRACTICE

Leverage AI throughout the product design lifecycle to accelerate discovery, reduce ambiguity, and improve design quality while maintaining human-centered decision making.

- Rapidly transform ambiguous product ideas into directional concepts and prototypes, enabling stakeholders to validate assumptions and align on requirements earlier in the product lifecycle.
- Synthesize stakeholder interviews, workshops, and meeting notes into structured UX artifacts, including business requirements, user stories, experience principles, and product documentation.
- Generate and iterate on design concepts and interactive prototypes to facilitate collaborative design reviews and accelerate stakeholder feedback cycles.
- Use AI-assisted usability and accessibility analysis to identify experience gaps, improve interface quality, and inform design recommendations for existing products.

- Create high-fidelity prototypes for stakeholder demonstrations and UX research, enabling faster validation through usability testing before engineering investment.
- Translate validated concepts into developer-ready Figma deliverables, including detailed specifications, interaction patterns, and design system components to support efficient engineering handoff.

CAREER HIGHLIGHTS

Enterprise Healthcare Platforms

- Led multidisciplinary design teams
- Mentored designers
- Enterprise design systems
- Large healthcare platforms
- Executive presentations
- Data visualization
- Decision support

Financial Advisor Platform

- Led product design across Payments, Accounts, and Payment Plan servicing experiences supporting millions of customer interactions.
- Designed complex enterprise servicing workflows spanning multiple product teams and business units.
- Simplified information architecture and customer journeys, contributing to a **27% reduction in average call times**.
- Partnered with Product, Engineering, Legal, Compliance, and Operations to deliver customer-facing digital experiences.
- Facilitated design critiques, usability testing, and stakeholder workshops to align teams around customer-centered solutions.
- Contributed to enterprise design systems while ensuring accessibility and consistency across experiences.

Customer Service Transformation

Redesigned servicing experiences at Bank of America using customer research and workflow analysis, helping reduce average call times by **27%**, improve agent efficiency, and deliver more consistent customer outcomes.

PROFESSIONAL EXPERIENCE

LPL Financial | Senior Product Designer | June 2025 – Present

- Lead UX strategy and product design for personalization, advisor branding, and entitlement management across the ClientWorks platform.
- Partner with product management, engineering, and business stakeholders to define product direction and prioritize customer experience investments.
- Conduct stakeholder interviews, stakeholder workshops, workflow analysis, and usability research to uncover opportunities for innovation.
- Translate research insights into intuitive user experiences to improve advisor efficiency while reducing administrative effort.
- Leverage AI-assisted workflows to accelerate research synthesis, concept generation, prototyping, and design exploration.
- Present design recommendations to senior leadership and influence roadmap decisions through data-driven storytelling.

Bank of America | Senior UX Designer | May 2023 – May 2025

- Led end-to-end UX initiatives supporting Payments, Accounts, and Payment Plan servicing experiences.
- Simplified complex servicing workflows through customer research and iterative design.
- Embedded usability testing and continuous customer feedback into product delivery, improving design quality and reducing downstream rework.
- Redesigned servicing workflows that contributed to a **27% reduction in average call times** while improving consistency across customer interactions.
- Collaborated closely with product managers, engineers, and business stakeholders throughout the product lifecycle.

Premier, Inc. | Principal UX Designer | January 2020 – February 2023

- Led UX strategy and experience design across healthcare platforms supporting supply chain, pharmacy, quality improvement, and clinical research.
- Managed and mentored a UX team consisting of three designers and one UX researcher.

- Directed discovery, concept development, validation, and delivery for multiple enterprise initiatives.
- Championed design system adoption and UX governance across multiple product teams.
- Led rapid-response COVID-19 initiatives that transformed predictive healthcare data into actionable decision-support experiences for hospital systems.

Premier, Inc. | Lead UX Designer | February 2010 – December 2019

- Led UX design across multiple enterprise healthcare products used daily by clinicians, administrators, and supply chain professionals.
- Facilitated product discovery, customer interviews, journey mapping, workflow analysis, and usability testing throughout the design lifecycle.
- Designed complex enterprise applications that improved operational efficiency and streamlined critical healthcare workflows.
- Built wireframes, prototypes, interaction models, and high-fidelity designs for responsive web applications.
- Partnered with executives, product managers, architects, and engineers to align customer needs with business priorities.
- Helped evolve enterprise design systems and UX standards that improved consistency across product portfolios.

EDUCATION

Bachelor of Science in Design: Clemson University

DESIGN & COLLABORATION TOOLS

Design: Figma, FigJam, Miro, Lucidchart

AI & Prototyping: Figma Make, Cursor, ChatGPT, Claude

Methods: User Interviews, Journey Mapping, Wireframing, Prototyping, Usability Testing, Design Systems, Information Architecture
